Professional Goals

In the last two years I have been trained in programing, starting with the b_IT program by CUTI, going through the Jóvenes a Programar from Plan Ceibal and taking some online courses recently. I learned about programming concepts like object-oriented, languages, frontend and backend frameworks, SQL databases and deep learning techniques.

To put into practices all this knoledges, I did some projects that you could look at my personal page.

As I continue such projects, I am looking for a labor oportunity to keep improving my skills.

Courses and certifications

Jóvenes a Programar - Fase 1
Plan Ceibal | Certificate
Date: 2020

Django for Everybody Specialization
Coursera | Certificate
Date: January 2021

Deep Learning Specialization:
Coursera | Certificate
Date: February 2021

Databases and SQL for Data Science
Coursera | Certificate
Date: July 2020

Machine Learning with Python: A Practical Introduction
edX | Certificate
Date: November 2019

Natural Language Processing with Classification and Vector Spaces
Coursera | Certificate
Date: October 2020

Academic History

Licenciado en Economía
Facultad de Ciencias Económicas y de Administración
Universidad de la República (2015 - 2020)
